

### **“Attention all members and corporate partners of the THA,**

Last week saw the Land Tax Amendment Bill passed through both houses of parliament in Tasmania which is a wonderful outcome considering where the issue was some 6-12 months ago. The State Treasurer calls this outcome the “biggest land tax reform this state has ever seen”. As a coalition and association we will still continue to fight for even greater reform in the area of land tax.

The THA through our General Manager was an integral part of the Land Tax Coalition Group and Steve was one of the members of the Group that attended meetings with all politicians and spent considerable time working on this important issue with a couple of other members of the coalition. The THA is proud of the success of this coalition effort and the assistance that our association and members showed.

The coalition will continue to meet on occasions to fight on behalf of all our members to get similar positive outcomes in areas of tax relief and other associated business issues that are common to different sectors.

The THA is proud to have been a major player in getting through this amendment bill through Parliament”.
